

1920S TÔLE PALM TREE ON CARVED WOOD BASE

\$7,500 A striking example of early 20th-century decorative arts, this 1920s tôle palm tree brings tropical fantasy and sculptural form to any interior. Crafted from hand-cut and painted metal, the fronds sweep outward with dramatic flair and retain a beautiful, time-softened patina. The trunk rises with stylized botanical detail and is anchored into a weighty carved wood base—adding both stability and rustic contrast to the lush green canopy. Likely French or Italian in origin, this piece reflects the era's fascination with exoticism and the natural world, often seen in conservatories and salon decor. Whether styled in a maximalist space, a sun-drenched entryway, or a Hollywood Regency interior, this 1920s tôle palm tree stands as both sculpture and statement. A rare and poetic accent piece that brings historic charm and vertical presence to any well-curated room.
