

A PAIR OF LARGE CUSTOM MIRRORS, DESIGNED BY WILLIAM HAINES

\$16,000 This collection, purchased directly from the heirs of the estate presents a rare opportunity to own a piece of Los Angeles design history. The house, originally designed by Paul Williams in 1933 was given the Haines touch when his clients, a young family of five, purchased and moved into the house in 1963. Haines made appropriate changes to the structure and being at the top of his game, both the architectural changes and the custom furnishings clearly illustrate this. He discreetly added a projection room to the front of the house so that the cleverly concealed projectors made for a movie going experience in the living room. Other Haines touches abound in this, a wonderful and thoughtful interior perfectly capturing a moment in time when life was glamorous. This pair of unique mirrors were created using antique elements by designer William Haines. The mirrors were designed to be hung in the dining room over a pair of consoles. The frame surrounds are solid walnut and the decorative carved wood details being the antique elements. The impressive size of these mirrors give them a real presence in any space. Provenance and COA will be provided to the buyer.

1963	Dimensions	Materials
Height: 67"H	Width: 50"W	Wood, Mirror
Width: 50"W	Depth: 2"D	Glass
