

A ROUND OCCASIONAL TABLE WITH A BRASS INSET BY BILLY HAINES

\$6,500 This striking round table by Billy Haines is a prime example of the quality of Haines' furniture. The table top is fabricated in stone and includes a round 4" diameter inset of polished brass. The four legs are metal and extend an inch out from the table, top adding a unique element to the piece. The legs are made of 2 pieces of metal secured to the underside of the table. Simple yet stunning, this side table will elevate any space. This design by Billy Haines found its way to the Estate of Jean Mathison. Haines would often make changes to client interiors and the pieces that were removed would be warehoused until he would gift them to employees. Ms. Mathison ran the design offices at William Haines Inc for 30 years.

1950-1959
