

AN ITALIAN CAST BRASS COCKTAIL TABLE WITH BIRD AND BRANCH DETAILS

\$7,000

An exceptional Italian cast brass cocktail table from the 1970s, featuring an intricate sculptural base of entwined branches with perched birds and leaves, all rendered in finely detailed brass. The birds appear to be Jay birds and all sport a berry in their beaks. The naturalistic form evokes the organic design sensibilities of mid-century Italian decorative arts, balancing whimsy with sophistication. A rectangular half inch glass top with notched corners is enhanced with a one inch bevel and rests gracefully on the sculptural frame, offering a clear view of the exquisite casting below.

This Italian cast brass cocktail table is a striking centerpiece for any interior — equally suited to a refined Hollywood Regency or nature-inspired modern setting. Beautifully patinated brass adds warmth and texture, complementing the minimalist transparency of the glass.
