

LARGE PAIR OF NEOCLASSICAL STYLE METAL PLANTERS WITH BURGUNDY PANELS, 20TH C

\$5,000
Pair

A bold and architectural pair of Neoclassical-style metal planters, each measuring an impressive 33 inches square. These striking vessels feature deep burgundy lacquered panels framed in matte black metal with crisply executed X-form crossbars. At the center of each panel, a gilt-bronze foliate medallion adds a classical accent, lending elegant contrast and a touch of ornamentation. Topped with spherical finials at each corner, the planters are designed with symmetry and structure in mind, blending both decorative and functional appeal. Their large scale makes them ideal for dramatic interior applications—flanking a grand entry, anchoring a terrace, or housing oversized topiary or sculptural plants in a conservatory or solarium. Stately yet versatile, these planters would suit Hollywood Regency, traditional, or eclectic design schemes.

1970s
