

PAIR OF LEDGEBACK SENIAH CHAIRS BY BILLY HAINES

\$26,000

This is a rare pair of ledgeback Senia chairs by Billy Haines. The chairs have been fully restored and reupholstered in this period fern print (currently still in production), and a Haines favorite. The arm rests wrap around the back of the chair to create the "ledge back". The legs are walnut and have been painted espresso to compliment the fabric. The rear legs have the signature Haines "kick". This is a wonderful opportunity to own a piece of American design history!

Excerpt from William Haines website:

"The ledge back design is the most sophisticated of all the Seniah designs having evolved from the original tight back, tight seat designed in 1947. It is distinguished by its classic, comfortable design."

1960s
