

PATINATED BRASS DISPLAY PEDESTAL

\$2,500 This is a beautifully patinated sculptural brass pedestal. It's smooth variations through out the patina create elegant curves following the curvature of the pedestal. The pedestal is in 3 pieces: a top circular brass plate, the bowled top half, and the base. It is hollow, but a plant could be placed inside as the pedestal is a wider diameter at the top. For a plant, keepsake, or sculpture, this pedestal alone will prove to be much more than an aesthetic addition to your interior. Cast in solid brass with a timeworn patina this pedestal will work indoors or outside where the patina will deepen.
