

SCULPTURE COCKTAIL TABLE IN LUCITE AND BRASS BY KARL SPRINGER

\$21,000 This is an impressive sculptural Lucite leg coffee table by Karl Springer. The cylinder lucite legs are 8.25" in diameter and finished with a polished brass detail that secures the glass table top. This design is most often found in mixed metals making this variation quite rare. There is a second table from the same estate also on offer. This piece came out of a home in Honolulu, Hawaii that contained numerous original and unique Karl Springer items. This is the smaller of 2 coffee tables of this style. The glass top measures 30" X 48", while the lucite legs add 4 additional inches to the total length and width. This table was originally bought in 1983 from the Karl Springer Los Angeles Showroom for a home in Honolulu. We have copies of these receipts and will provide them with the purchase.

1983

Dimensions

Height: 17"
Width: 52"
Depth: 34"

Materials

Lucite,
Brass
