

SKYSCRAPER CENTER TABLE DESIGNED BY CHARLES HOLLIS JONES

\$12,500 This table's design was originally made for screen legend Loretta Young by Charles Hollis Jones. The unique base of this show stopper consists of an 18" base that supports both Brass and lucite rods. The placement of the lucite laid out in an ascending/descending order creates a "skyscraper" effect giving the table its name. This table is seen more often in its smaller side table version making this a unique opportunity to purchase a design classic. As a small dining table or as a center table, this piece will receive much attention wherever it is placed.

1970-1979
